Ratings: Evaluate yourself on where you stand on the following key issues.
Possible Positions: Strongly Agree with Side A, Somewhat Agree with Side A, Neutral, Somewhat Agree with Side A, Strongly Agree with Side A

1. Cost of Living

- **A:** The government should lower costs mainly by cutting regulations and taxes and letting markets bring prices down, even if that means fewer direct consumer protections.
- **B:** The government should lower costs through direct action, such as subsidies and aid for housing, childcare, and utilities, even if that increases public spending.

2. Trade

- **A:** The US should reduce tariffs and expand trade agreements, even if some domestic industries face more foreign competition.
- **B:** The US should use tariffs to protect domestic industries and reduce trade deficits, even if some consumer prices rise.

3. Taxes and Social Programs

- **A:** The government should raise taxes to fund expanded social programs, even if that increases the overall tax burden.
- **B:** The government should cut taxes and reduce spending on social programs, even if some people receive fewer benefits.

4. Healthcare

- **A:** The government should limit its role in health insurance and rely more on private market options, even if fewer people end up covered.
- **B:** The government should expand publicly funded health coverage, even if that raises public spending.

5. Immigration

- **A:** Immigrants living in the US without legal status who have no criminal record should be offered a path to legal status, even if that may encourage future unauthorized immigration.
- **B:** Immigrants living in the US without legal status should be removed through expanded enforcement, even if that requires large-scale operations and significant cost.

6. Artificial Intelligence

- **A:** The government should keep AI rules minimal so the US leads globally, even if that means more data center construction and higher energy demand.
- **B:** The government should strictly regulate AI companies and data center growth, even if that slows AI development.

7. Voting and Elections

- **A:** Elections should prioritize ease of voting, such as expanded mail-in and early voting, even if that means fewer verification steps.
- **B:** Elections should prioritize stricter verification, such as voter ID and proof of citizenship to register, even if that makes voting harder for some eligible voters.

8. Public Safety

- **A:** Public safety policy should prioritize more police funding and stricter sentencing, even if incarceration rates rise.
- **B:** Public safety policy should prioritize crime prevention, rehabilitation, and policing reform, even if some offenders receive lighter sentences.

9. Foreign Policy

- **A:** The US should reduce its military commitments abroad and avoid involvement in foreign conflicts, even if that means less influence over global events.
- **B:** The US should actively use military and economic power abroad to protect its interests and allies, even if that risks involvement in foreign conflicts.

10. Abortion

- **A:** Abortion should be legal in most cases, with limited restrictions.
- **B:** Abortion should be illegal in most cases, with limited exceptions.
